To Whom It May Concern:

I am pleased to highly recommend Megan Teresi for any teaching position for which she qualifies. I am currently Megan's clinical supervisor representing the University of Northern Iowa during her student teaching experiences at both Westwood Elementary School and at Verda Dierzen Early Learning Center in Woodstock. Megan has recently completed 8 weeks in a fourth grade classroom at Westwood and is presently teaching in a kindergarten classroom at Verda Dierzen. Her practicum has been from August 20 through December 11, 2015.

Megan has presented herself as bright, personable, and extremely conscientious. She has developed positive relationships with both staff members and her students. She comes across as a natural born teacher who has a great outlook regarding herself as an educator. It's as though she can't wait to get going in her own classroom! It has been fun to observe Megan's enthusiasm and love of teaching. She has presented lessons that are both appropriate and effective for the age level of student she is teaching. Megan has a very engaging manner with her students.

Megan has always been very professional and has taken her responsibilities seriously. She has excellent organizational skills and this has shown in her well prepared and thought out lessons. Megan teaches with attention to learning standards and to the needs of students. She has treated students with respect while holding high expectations for the quality of their work. Her students seem to like Megan and find her warm and encouraging. She will be a highly regarded asset in any teaching position. Her future students will be fortunate to have her as their teacher. Feel free to contact me regarding Megan Teresi.

Sincerely,

Laurie Stecker
University of Northern Iowa
Student Teaching Supervisor
